

Mystere

MCD2202 – Pearl Slate

Candice Olson Contract

Like slabs of geologic material in varied shapes and sizes, this arresting pattern has concentric lines in tonal colors with mineral highlights. The appearance of natural aggregate is handsome and in keeping with current trends in “green” and organic design. The seven color ways include Storm, in shades of grey with silver streaks, and Meringue, in beige with veins of gold. The finely textured vinyl is long wearing and washable.
