MHE12302 – Continuous Flow Sculpture

Accessories

Inspiration for this sculpture came from watching a local welder melting metal rods and connecting the two ends. One continuous line was formed but the flow of the line was curved, twisted, and in some areas straightened but never broken. Final touch is a golden lustrous finished sculpture sitting on top of a polished white marble base.

Specifications

Height 15.5H
Material Polyresin
Width 5.1/4W
Weight 1.45
Finish Matte
