Accessories

MHE130016 – Daintree Vase

Inspired by the 5th largest rainforest in the world located in Australia. The deep rich colors of the foliage's presented us with the color palette to use. As the mist collationed and moved through the trees a pattern started to emerge. The Daintree vase took on the rich foliage color and barrowed the frosted wavey pattern from the misty view. A beautiful work was created to capture the sights of a truly magnificent view. The craftsmen work by hand to cut and polish each piece so if you either fill this vase with the seasons freshest cut flowers or place it in a prominent spot for viewing, this piece truly makes a statement.
