Accessories

MHE130020 – Barrick Vase Large

The Barrick vase features a beautiful four tone ombre color effect. It starts at the bottom with a antique silver base and moves upward blending into a gold champagne band and then finally from the champagne gold emerges a touch of bronze that dissipates into a aged antique pewter. The effective way that the colors all blend and play off each other is only enhanced more by the subtle grid pattern that is cut throughout the piece. These stylish vases make an unbelievable statement of style and sophistication, especially when it is illuminated with candlelight inside.
