MHE130051 – Juniper Moss Green Marble Vase, Short Accessories

The deep rich green and taupe colors of this marble created an image in our head of a lush forest with a ground cover of delicate juniper moss and rock formations. This image became the inspiration for the short cylindrical vase. The natural veining of the stone creates a unique pattern that no two vases will share. Whether filled with flowers or used for its natural beauty this vase delivers style with a uniqueness all it's own.
