Accent Furniture

MHE27032 – Santiago Nesting Tables

The inspiration for the Santiago tables came out of fashionable post modern tables that were functionable and stylish at the same time. The original nesting tables were manufactured to save on space and could be separated if more tabletop space was needed for entertaining larger groups of people. The Treto tables each feature a beautiful white marble top that is suspended between a matte black iron frame. This styling fits right at home in an industrial loft or modern Highrise condo.
