Accessories

MHE51395 – Celestial Metal Basin

Inspiration for the Celestial collection came from simply the night sky. The color contrast between the dark blues and the rich shades of bronze becoming the starting point to create something very striking in design. Each piece in the collection is hand crafted and beautifully finished. The metal basin was created to be as sculptural as it is functional. The basin could be used as a cover for a plant as well as a piece of artwork setting on a pedestal.
